

Yuhiko Aoyama

yaoyama@pku.edu.cn

Kavli Institute for Astronomy and Astrophysics, Peking University

Kavli Institute for Astronomy and Astrophysics
Peking University, Haidian District
Beijing 100871, People's Republic of China
(+86) 010 6275 6692

Unit 7, room 1510
Xiajia Yuan, Chaoyang District
Beijing, 100028, People's Republic of China
(+86)18500436138

EDUCATION

The University of Tokyo

Tokyo, Japan

Ph.D., Science

May 2019

Dissertation: "Constructing theoretical model of gas accretion for constraining planet formation theory by using observations of forming stars and planets: modeling non-equilibrium micro-physics in detail"

M.A., Science

May 2016

B.A., Science

May 2014

POSITIONS

Postdoc, Peking University

July 2022–

Postdoc, Tsinghua University

Sep. 2019–June 2022

Postdoc, The University of Tokyo

Apr. 2019–Aug. 2019

RESEARCH INTERESTS

Planet formation

Star formation

Astrophysics

Hydrodynamics

Radiative transfer

Astrochemistry

GRANTS AND AWARDS

Boya fellow

2022

Shui-Mu Tsinghua Scholar

2019

Leading Graduate Course for Frontiers of Mathematical Sciences and Physics

2016-2019

SKILLS

Proficient in numerical modeling with Fortran (advanced), C (advanced), and CUDA (beginning)

Advanced use of open-source software (Athena++)

Basic use of open-source software (FLASH and Cloudy)

Proposed observational targets and attended observations at Subaru observatory in Hawaii

PUBLICATIONS (first authored)

CONFERENCE PRESENTATIONS

1. **Aoyama, Y.** and X. Bai. Type II planet-disk interaction and circumplanetary disk formation in windy protoplanetary disk. Contribution talk delivered at Athena++ Workshop, New York, USA, May 2023.
2. **Aoyama, Y.** and X. Bai. Type II planet-disk interaction and circumplanetary disk formation in windy protoplanetary disk. Contribution talk delivered at 2023 International Conference of Deep Space Sciences, Hefei, China, April 2023
3. **Aoyama, Y.**, G.-D. Marleau, and J. Hashimoto. Hydrogen line emission from accreting planetary-mass objects. Poster delivered at Protostars and Protoplanets VII, Kyoto, Japan, April 2023
4. **Aoyama, Y.** and X. Bai. Type II planet-disk interaction and circumplanetary disk formation in windy protoplanetary disks. Poster delivered at Protostars and Protoplanets VII, Kyoto, Japan, April 2023
5. **Aoyama, Y.** and X. Bai. Type-II planet-disk interaction with a magnetized disk wind. Contribution talk delivered at Stars, planets, and Formosa, Taipei, Taiwan, August 2022
6. **Aoyama, Y.** and M. Ikoma. Modeling of Hydrogen line emission from the accreting gas giant PDS70b. Contribution talk delivered at 2021 National Planetary Science Conference, Suzhou, China June 2021
7. **Aoyama, Y.** and M. Ikoma. Theoretical modeling of spectral profile with 1D-radiation hydrodynamic simulation: constraining the accretion rate and mass of the protoplanets PDS70b and c. Spirit of Lyot 2019, Tokyo International Exchange Center, Plaza Heisei, Tokyo, Japan, October 2019
8. **Aoyama, Y.** and M. Ikoma. Theoretical Modeling of Spectral Profile from the Two Protoplanets PDS70b and c. Contribution talk delivered at Planet2/RESCEU Symposium 2019, Bankoku Sinryokan, Okinawa, Japan, October 2019
9. **Aoyama, Y.**, M. Ikoma, and T. Tanigawa. Theoretical Modeling of Hydrogen Line Emission from Accreting Star and Planet. Contribution talk delivered at Theoretical and Computational Challenges in Planet Formation Workshop, CCA, Flatiron Institute, NewYork, USA, May 2019.
10. **Aoyama, Y.**, M. Ikoma, and T. Tanigawa. Theoretical modeling of shock-heated gas around accreting gas giants: comparing with observed hydrogen lines. Invited speak delivered at Symposium on Planetary Sciences, Tohoku University, Miyagi, Japan, February 2019.
11. **Aoyama, Y.**, M. Ikoma, and T. Tanigawa. Theoretical Model of Hydrogen Line Emission from Accreting Gas Giants. Poster presentation delivered at The ninth Moscow solar system symposium, Space research institute, Moscow, Russia, November 2018.
12. **Aoyama, Y.**, M. Ikoma, and T. Tanigawa. Theoretical estimate of Hydrogen line intensity emitted from accreting gas giants. Oral presentation delivered at the Circumplanetary Disks and Satellite Formation, Nagoya, Japan, March 2018.
13. **Aoyama, Y.**, M. Ikoma, and T. Tanigawa. Theoretical estimate of intensity of hydrogen line emission from accreting gas giants. Oral presentation delivered at the 10th RESCEU/Planet2 Symposium, Tokyo, November 2017.
14. **Aoyama, Y.**, M. Ikoma, and T. Tanigawa. Hydrogen line emission from accreting gas giants. Oral presentation delivered at Planet 2 Symposium 2017: Origin and diversity of planetary systems from the microscope to the telescope, Villefranche, French, February 2017.

Also 3 first-authored and 7 co-authored presentations at international conferences and 16 presentations in Japanese
